Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Prosecution Application

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 17, 2005 has been entered. Claims 16-19 and 53-56 are pending in the application.

Response to Arguments

2. Applicant's arguments with respect to claims 16-19 and 53-56 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 16-19 and 53-59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 16 and 53 recite that the “dynamically creating a search menu using the metadata

Attributes”. However, it is not understood how the search menu can be created using the metadata attributes if the search has already been performed. It is noted that the search menu should be created prior of the user searching of the component. Appropriate action is required.

Claims 17-19 and 54-59 depend from independent claims 116 and 53 and are therefore are rejected under 35 USC 112 second.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 16, 18-19, and 55-56 are rejected under 35 U.S.C. 103(a) as being anticipated by Danish et al “Danish” (US Patent No. 6,327,588).

As per claim 16, Danish discloses a system and method for executing a guided parametric search. In so doing, Danish discloses associating a particular metadata attributes (i.e. the part number information represents the metadata attributes col. 5, lines 35-51), displaying a graphical model of the component and allowing a user to select the graphical model (i.e. a graphical image of the part number information col. 12, lines 30-54), performing a search of a database using the metadata attributes, and dynamically creating a search menu using the metadata attributes, allowing the user to perform a search) (col. 5, line 62 through col. 6 line 10).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danish et al "Danish" (US Patent No. 6,327,588).

As per claims 17 and 54, Danish discloses providing the user with the ability to search on the basis of a keyword (col. 1, line 55 through col. 2 line 11) but fail to expressly disclose providing the user with ability to search from site number, supplier part number, manufacturer part number, supplier, would have been obvious to a person of ordinary skill in the art in order to guarantee a user that at least one item will be identified.

Conclusion
